EDWARD F. DIBBLE SEEDGROWER . . . . HONEOYE FALLS, N. Y.

TERMS NET. NO DISCOUNTS ALLOWED. BAGS AND SACKS FREE AND NOT RETURNABLE. CASH WITH ORDER.  
PRICES ARE FREE ON BOARD CARS AT HONEOYE FALLS, N. Y.

Dibble's D. B. Brand Alfalfa, Clover and Grass Seeds are the highest grade obtainable. Average analysis for years has been approximately 99.70% pure and an average of around 99.50% is guaranteed. Every bag of Dibble's Alfalfa, Clover, Grass and Grain Seeds has a tag showing our Purity and Germination test. They are sold on a ten-day-money-back-if-you-want-it guarantee subject to any test you many choose to make. Is there a fairer way to sell, or a safer way to buy Farm Seeds? WE QUOTE TODAY'S VALUES SUBJECT TO MARKET CHANGES. Samples of seeds (except potatoes) on request. We guarantee that all of our Clover and Alfalfa will meet the requirements of the Soil Conservation Program.

## The Latest on the Farm Seed Situation

The surplus in wheat, corn and cotton in this country together with the Soil Conservation Program will cause an increase in the plantings of Alfalfas, Clovers and the grasses. Prices could easily advance from present low levels.

There were large crops of Alfalfa and Clover seed harvested in 1940 and prices are much lower than for several years. We believe that purchases should be made at present low levels. Right now there is a stronger feeling and markets are firm.

Total stocks of merchantable potatoes on hand as of January 1, 1941 in the 37 late and intermediate states were 118,555,000 bushels or about 14 million bushels more than last year. This increase will be more than offset by the Starch Diversion Program in Maine, the Livestock Feed Diversion Program in the western states and the Food Stamp Program. With more of our people gainfully employed than ever before in history and with these government agencies taking the surplus out of consumption there is every reason to believe that there will be an improvement in old potato markets.

## SEED CORN OF GOOD QUALITY ESPECIALLY SCARCE

The supply of mature seed corn of high germination in New York, Pennsylvania and Ohio is the shortest in many years. The crop was planted late and did not have the warm weather necessary to make good corn. Lack of drying weather in the fall of 1940 and early freezes made conditions still worse. Many crops never matured and still many more that did mature carried a very high moisture content both in kernel and in cob. Corn with a high moisture content was severely damaged for seed. Germination tests at the Experimental Stations of New York, Pennsylvania, and Ohio show that the outlook for good seed corn is very unsatisfactory.

Our company realized the situation and took steps to properly dry our corn before cold weather and as a result we have a good supply of high germinating seed. Let us supply your needs while stocks are still available. Avoid using unadapted varieties.

*A True  
Statement  
concerning  
this year's  
Seed Corn*

The supply of mature Seed Corn of high germination for our Northeastern farmers is the shortest in many years. The crop was planted late and did not have the warm weather necessary to make good seed. Lack of drying weather in the fall of 1940 and early freezes made conditions still worse. Those crops that did mature carried so much moisture, both in kernel and in cob, that unless they were carefully dried much of the germination power was ruined by freezing. Germination tests at the Experimental Stations of New York, Pennsylvania, and Ohio show that the outlook for good seed is very unsatisfactory. This year there is not sufficient seed of adapted varieties to plant the usual acreage in the Northeast. Let us supply your needs while stocks are still available.

# DIBBLE'S 50th Anniversary

DEAR FELLOW FARMERS:

What seed shall I sow this year? At this season of the year we all ask ourselves this question and form our plans according to our conditions.

You, as a progressive farmer, are interested in better seeds. You want to increase your yields. Dibble's Northern-Grown Tested Seeds will help you solve that problem.

A short time ago we mailed to you our 50th Anniversary Catalog describing Dibble's Farm Seeds. We are now sending you a new price-list quoting today's prices.

In a short time now your land will be ready for seeding. Are you sure you have planned for all the seed you will need? Look our Catalog over again and compare Dibble's prices with those of other reputable seedsmen. Our motto has always been "FARM SEEDS AND FARM SEEDS ONLY; ONE GRADE AND THAT THE BEST OBTAINABLE AT THE LOWEST PRICES CONSISTENT WITH THE HIGHEST POSSIBLE QUALITY." There is no better time to place an order than right now. We can ship at once or later as you may direct.

On this, our 50th Anniversary, we again wish to thank our many friends and customers for the loyal support they have given us. We fully realize that without the good will of our fellow farmers our company would not be in the position it is today to render service. Trusting that we may be favored with your seed orders for 1941, we beg to remain

Sincerely yours,

EDWARD F. DIBBLE SEEDGROWER

## DIBBLE'S DOUBLE-CROSS HYBRID 29-3 CORN

was developed at the Cornell Agricultural Experimental Station to meet the growing conditions in New York State and similar conditions in other areas. It matures in 110 to 115 days and is recommended for ensilage wherever West Branch Sweepstakes or Leaming is now used and for grain wherever a late strain of Cornell No. 11 matures. Comparative tests show it produces 40 to 50 per cent more grain at silage-cutting time and 15 to 20 bushels more of dry shelled grain per acre at husking-time.

# • Our Guarantee •

For fifty years we have been supplying the needs of American farmers. Our business policy has been based on an ideal which we adopted fifty years ago. "FARM SEEDS AND FARM SEEDS ONLY; ONE GRADE AND THAT THE BEST OBTAINABLE AT THE LOWEST PRICE CONSISTENT WITH THE HIGHEST POSSIBLE QUALITY."

As we reach the half-century mark, we wish to express our gratitude to our many friends and customers for the loyal support which they have given us. We love the work we do and we give our pledge that we will endeavor to furnish the highest grade of farm seeds that it is possible to grow.

There is just one reason why we can afford to make the guarantee we do and allow you to be both judge and jury, and that is because our seeds are that kind. Dibble's famous "money-back-if-you-want-it" guarantee, subject to any test you want to make within ten days after the seeds reach you, is as fair and square as any ever given by an American firm. And our special guarantee or warranty is printed on the respective pages describing our seeds, and our various seeds are sold subject to the guarantee so printed. We are perfectly reliable and responsible. We refer you to the State Bank of Honeoye Falls, N. Y., Lincoln Alliance Bank and Trust Co., Rochester, N. Y., Dun & Bradstreet, Inc., Commercial Agency, or to any of our thousands of satisfied customers, some of whom must be in your vicinity.

Sincerely yours,

EDWARD F. DIBBLE SEEDGROWER

STYLES MAY CHANGE, BUT NOT  
THE QUALITY OF DIBBLE'S SEEDS

## DIBBLE'S SEED POTATOES

are grown by experienced seedgrowers, and in soils best adapted to each variety we offer. Rigid state and individual inspection insures a minimum of disease. We can say with honesty and with pride that we have good crops of all varieties and can furnish you with the best of seed.

## DIBBLE'S OATS

are productive and often give twice the yield of ordinary seed. Read the description in our Catalog and let us supply you with varieties that have proved their worth on hundreds of farms in the Northeast Territory. The tributes we have had from satisfied customers tell the story. See pages 8 and 9 of our 1941 Catalog.

## NORTHERN-GROWN DOMESTIC CLOVER

U. S. Verified as to origin and the kind you need to withstand our cold winters here in the Northeast. Dibble's D. B. Brands are the Cream of the Crop—99.50 per cent pure or better.
